OUR DIGITAL FUTURE NEWSLETTER

We are pleased to share with you the current stage of the Our Digital Future Project in this newsletter!

The visual infographics for the eight job sectors connected with modern technologies. Artificial Intelligence Development, Alternative Energy Consultancy, Cyber Security, 3D Printing, Robotics, Virtual Reality Design, Blockchain technologies and Food Technology. They are now fully available in English, Spanish, Greek, Polish and Portuguese, and can be found using this link: <http://app.odf-project.eu/>. The infographics were shown to the focus groups participants which gave the consortium a lot of insight into the topic.

The partners of the consortium have also recorded 16 video-interviews with experts (2 per sector). They will be soon released on our YouTube channel: https://www.youtube.com/channel/UCxz_RKs5sCRe9y4qibaM5Jw. They will be also available on the platform and subtitles in the languages of the consortium will be available.

The final output of the project will be lesson plans strictly connected with the video interviews. They will be dedicated to use by educators during the group or individual career sessions.

Recently, on the 5th and the 6th of July the consortium has met in Volos for a transnational project meeting during which the current status of the project and its next steps were discussed.

Please don't forget to check out the links to our websites and social media. Stay tuned for further updates!
